ABSTRACT

WHITE PAPER

**GOLD FOOTBALL
MANAGER (\$GFM) IS THE
REWARD, REVENUE-SHARE
AND GOVERNANCE TOKEN
OF FOOTBALL MANAGER.
IT OPERATES AS THE FUEL
TO THE WHOLE FOOTBALL
MANAGER ECOSYSTEM.
THE LONGER THE PROJECT
GOES ON, THE FEWER NEW
TOKEN GET MINTED. WITH
RISING TVL (TOTAL VALUE
LOCKED) ON THE
PLATFORM, THE REVENUE-
SHARE GETS MORE
LUCRATIVE.**

**GOLD
FOOTBALL
MANAGER**

INTRODUCTION

GFM is a modern-day decentralized Gamefi crypto-centric ecosystem built on the Arbitrum blockchain. GFM is meant to be a high-performance platform that can deliver various services. To attract more people to digital assets by letting them make money, we will create an ecosystem consisting of soccer Game, Staking, governance, liquidity pool, farming, NFTs, and our P2E game.

The GFM platform will enhance the gaming experience for players and developers via Blockchain and Smart Contract Technology. As part of our goal, the mobile gaming platform GFM will leverage blockchain technology for its rewards system. GFM is a decentralized soccer game made for online and offline soccer lovers. Play-to-earn games are one of the gaming industry's fastest-growing categories. GFM will develop a decentralized game for P2E gaming enthusiasts.

GFM is a game where players get rewards based on their rankings. Participants may use their NFTs. Our objective is to place the GFM game at the top of the list of the greatest P2E games. The game is an Arbitrum blockchain-based P2E game that combines NFT and Defi mechanics.

By delivering GFM to pairs of LP Token holders, farms encourage users to offer liquidity for trading pairs. Individuals who offer liquidity may receive GFM incentives through yield farming by securing their LP tokens behind a smart contract. In the crypto realm, yield farming is an incentive system. Yield Farms enable users to earn GFM tokens while staking LP Tokens to support the GFM token network.

GFM NFT is an essential component of our ecosystem related to NFTs. On the blockchain, our Non-fungible tokens (NFTs) are unique, non-transferable assets. The originality and authenticity of our non-financial assets differentiate them from other types of assets and give them a special worth. We will launch a collection of NFTs that will be integrated into our ecosystem. GFM NFTs are used throughout our game. GFM will develop a marketplace where ecosystem participants may buy, sell, or trade NFTs and other digital assets. By owning our token, GFM enables token holders to participate in tournaments.

GFM operates on the eco-friendly Proof-of-Stake ecosystem. The platform stores all staked tokens using a secure wallet and a technique of double-checking. As more individuals, particularly institutional investors, appreciate the profitability and efficiency of the cryptocurrency market, Staking is progressively becoming a technique of passive income generation by simply Staking or keeping assets in a wallet. As an incentive for Stakers, GFM wants to offer a Token on the Arbitrum network.

The GFM TOKEN protocol guarantees that token holders' assets are promptly locked for liquidity. Automatic LP is the GFM token's secret. All of these measures are taken in an effort to alleviate some of the concerns with the existing DeFi reflection tokens. Providing liquidity creates LP Tokens, rewarding liquidity providers with trading fees and assuring the exchange's continual liquidity.

We will have access to many member-exclusive features as a community-driven ecosystem that supports a gaming-focused atmosphere. Members of our governance ecosystem can participate in entertaining gaming-themed NFTs, Play2Earn games, and football contests. Members will also be able to vote on the usage of community funds, company financing approvals, joint ventures, NFT investments, and other asset choices such as exchange, crypto, and NFTs. As a DAO member, EVERY member will get a specified ownership interest in ALL DAO business endeavours.

We envision a world where people can get everything they need in a GameFi ecosystem and Wealth-building strategies previously only available to the affluent people now become available to everyone, restoring people's control over their finances.

The GFM network will create an all-in-one platform to attract more people to digital assets by allowing them to earn money through gaming ecosystem along with Staking, liquidity pool, farming, DAO and NFTs with gaming events while maintaining their privacy, security, authority, and autonomy. It is expected that GFM would establish an ecosystem based on proper monetary rules and a stable decentralised foundation. Our vision is to become the most trusted all-in-one ecosystem.

GFM Vision is Encapsulated With Three Main Components;

Community-Focused

Growing the GFM network by the people for the people

Innovation

To be the world's most crypto-centric platform

All in one Gaming Ecosystem

Providing all facility to gamers under an umbrella

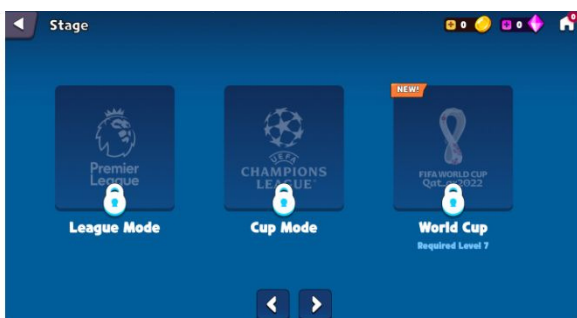

GAMING OVERVIEW

The gaming sector seems to be among the first to adopt Blockchain technology, and blockchain gaming is the future of gaming. The blockchain and gaming worlds are now very much in sync. People interested in blockchain are also likely to be interested in and engage in gaming. The prevalence of NFTs in the gaming industry highlights this, with many rare and valuable NFTs exchanged within games.

Blockchain technology is an essential component of future financial technologies. The notion of an incorruptible ledger is gaining popularity outside of the realm of crypto disputes. Through our Blockchain and Smart Contract Technology, the GFM platform will improve the gameplay experience for both players and developers. The GFM Gaming Platform provides all users with a completely transparent, safe, and secure environment.

It lets players store their game things and trade, sell, and buy in-game items on a decentralised cutting-edge marketplace. We want to build a gaming community where players can communicate and exchange knowledge while playing their favourite games. We seek to bridge the gap between the online and offline gaming worlds. GFM, a mobile game platform, will use blockchain technology for its rewards system as part of our strategy.

GFM is a decentralised soccer game designed to appeal to online and offline soccer fans. Football Manager is currently only open to the league mode, and we will open other ways to play in the future. Players will be able to experiment with the PvE league mechanics. By making their own team, players can play leagues daily. GFM employed three modes in the game League Mode, Cup Mode & Worldcup Mode. Players should have enough \$GFM tokens to participate in the league while to unlock Worldcup mode, players should reach level 7 to participate in Worldcup mode to earn more rewards.

Unlock Football Captain

After each player enters the game to set the game nickname and complete the address binding, players must choose at least one football captain and complete the unlocking.

There are currently 8 football captains with different attributes to support players to unlock; each character has unique skills and talents. It costs 40 USD to unlock each football captain.

Upgrade team captain

After each match, the captain can get corresponding experience points and have a chance to get skill gems. Gold coins and amethysts can quickly improve the captain's experience attributes.

Get Game Star Card

For each game, players need to match at least 11 players' NFTs in the Stage. Each player has the most suitable position for him. Different game lineups and player collocations will directly affect the game's results.

There are currently three ways to get Game star cards:

- Draw star cards from the SHOP

There are two different star card blind boxes for sale in the shop, and each blind box can get a star card, and the PREMIUM CARD will have a higher probability of getting a high-quality card.

We will announce the probability of two different card sales before the SHOP opens.

- Season Pass

We will launch an exclusive pass for the current season at the beginning of each season.

Players can receive pass rewards for free through the Free Pass or spend 200 USDC to purchase the Golden Pass to unlock more rewards. The star card rewards in each season pass are unique and cannot be obtained elsewhere.

- Daily login rewards and other event rewards

Players may win rewards by LOGIN reward; Mission will list tasks that test players' knowledge of the world of Football and keep users active. Players should pay attention to Mission tasks.

Combine and get better player cards

Player cards obtained by players have different rarities. We provide a method to increase the rarity quickly. Obtaining specific player cards will provide you with higher income and improve the attributes of all playing cards.

Play-to-earn is one of the fastest-growing genres in the gaming market today. GFM has opened the door for crypto gamers worldwide, otherwise believed to be out of reach for the majority. Rewards earned can be transferred, sold on exchanges, and even converted into other currencies. This provides an incentive to play, giving projects a significant, sustainable user base.

To us, the inevitable future of gaming is to provide players with things they can own, destinations they can trade, and incentives for their time. The next part of the ecosystem incorporates satisfying, and sustainable Play earn features. NFTs and GFM have provided us with the tools to pave the way for this future. The GFM game is our answer to this problem, built to be the foundation of the Play to Earn economy.

With the global pandemic stretching into 2022, many are turning to P2E gaming as an income source, with many of these participants being described as impoverished and poor. We are happy to provide great games for our community to enjoy and opportunities to earn in times when nothing is certain. We here at GFM plan on developing a fun and interactive game for our community and many economic opportunities while playing our games.

GFM will create a decentralized game aimed at P2E game lovers. GFM is a game in which players are rewarded depending on their ranks. Players can participate with their NFTs. Our vision is to make the GFM game on top of the best P2E Game list. GFM has become a top gaming title among blockchain games. The game is an Arbitrum blockchain-based P2E game with a blend of NFT and DeFi. The NFT-inspired franchise allows players to collect, raise and purchase gaming assets as NFTs.

By forming their own team, players can play league matches every day. During this period, players need to ensure that they have sufficient energy and need to mortgage enough \$GFM tokens. Each game takes 5 minutes, and the system will automatically match the opponent according to the player's captain selection, lineup arrangement, and player matching.

The result of each game contains a random factor, and the random factor for all players to win is the same. After each game, players can get corresponding game rewards. The higher the level of the captain, the higher the rarity of the player, and the higher the reward. These game rewards include captain experience points, \$GFM tokens and other props in the game.

After the end of each season, the Ranking will display the victory value of each player and give corresponding rewards to grant game ranks.

GLOBAL GAMING INDUSTRY

The growth of social networks, cellphones, and tablets has given rise to new mobile and social game genres. Since the first games were released in the 1970s, video games have come a long way. Today's video games have photorealistic visuals and, in many cases, accurate reality simulations.

The value of the global video game market is depicted in the timeline below. The market was evaluated at around 115 billion dollars in 2018, with sales exceeding 138 billion by 2021. As user involvement with gaming rose during the worldwide COVID-19 epidemic, the average number of in-app purchases per paying user climbed to an all-time high across all gaming genres in 2020. According to another poll of mobile game creators, platformers are the most profitable free-to-play genre.

YEILD FARMING

Farms incentivize users to provide liquidity for trading pairs by distributing GFM to pairs LP Token holders. Yield farming allows users who provide liquidity to earn GFM rewards by locking their LP tokens into a smart contract. Farming is a reward scheme in the crypto world. Anyone who is part of the GFM token ecosystem can easily do it. Yield Farms allow users to earn GFM token while supporting the GFM token platform by providing liquidity in LP.

Yield farming credit markets offer new strategies for crypto owners to earn incredibly attractive returns on their cryptocurrency, at least several times higher than a traditional bank would offer. Yield farming also offers higher profits than almost any traditional investment channel, from real estate to stocks and bonds.

GFM NFT is a vital part of our ecosystem dealing with NFTs. Our Non-fungible tokens (NFTs) are one-of-a-kind, non-transferable assets created on the blockchain. The key characteristics of our NFTs distinguish them from other forms of assets and give them a distinct value, including uniqueness and authenticity. The scarcity and ownership of any particular token may be ascertained without the requirement of a trusted middleman since the underlying code is visible.

The advent of NFTs is part of a more significant paradigm shift away from centralized to decentralized systems. This platform allows developers of digital items to experiment with new revenue strategies. GFM cannot be replicated or transferred without the user's permission.

We will launch our NFTs collection that will be connected with our ecosystem. Our NFT project has in-game utility. The underlying code for each NFT encodes a unique genome that defines its appearance, traits, and hereditary lineage.

GFM NFTs are employed in our game. GFM will establish its marketplace where players may buy, sell, or exchange their NFTs and other digital assets in our ecosystem. GFM allows its token holders to participate in tournaments by holding our tokens. By participating in this competition, players may receive extra benefits, and the winner will receive compensation.

Our NFT holders will get the following rewards Some of the advantages of GFM NFT include:

Ownership Rights

Non-fungible tokens have a major benefit in that they may be used to verify ownership. Because they operate on a blockchain network, NFTs can help to bind ownership to a single account.

Authenticity

Non-fungible tokens' benefits are mostly defined by their scarcity. The blockchain is used to construct NFTs, which implies they are linked to one-of-a-kind data. NFTs' unique characteristics demonstrate their capacity to add value. Simultaneously, NFT makers can release a limited quantity of NFTs in order to generate supply scarcity.

Fraud proof

They're simple to transmit and aren't harmed by fraud.

GLOBAL NFT MARKETPLACE

In 2021, the popularity of non-fungible tokens skyrocketed, with multimillion-dollar sales smashing records. Statista, "the NFT market will surpass \$40 billion in 2021. According to DappRadar, the trade volume of NFTs in 2021 was \$24.9 billion. This is an increase from \$95 million in 2020. In 2021, there were 2.7 million unique active wallets as a proxy for users, with 49 percent of those users connected to NFT games. Although the average NFT price fluctuated between \$6,900 and \$1,300 in January, a record-breaking 2.4 million NFTs (worth \$4.8 billion) were traded on OpenSea. Over the previous 30 days, the total sales value was around 87 million dollars as of February 15, 2022.

In 2020, NFT projects in art and gaming valued several millions of dollars, but they were significantly smaller than in 2021".

GFM operates on the eco-friendly Arbitrum Blockchain based on proof of stake. It is not only one of the major gaming platforms, but it also provides excellent Staking services. GFM ensures that consumers' money is safe by deploying sophisticated security technologies and providing a Secure Asset Fund (SAFU). At the time of writing, our Staking methodology is definitely one of the most secure and ecologically beneficial methods of generating passive income. The platform employs a secure wallet and a double-checking technique to store all staked tokens.

As more individuals, particularly institutional investors, appreciate the profitability and efficiency of the crypto market, Staking is increasingly becoming a technique of generating passive income by simply Staking or keeping cash in a wallet.

Staking is beneficial in cryptocurrencies since it gives incentives and passive income by staking tokens on any exchange. In a decentralized setting, staking a token and the pool is the most convenient choice. As an incentive for Stakers, GFM plans to provide a Token on the Arbitrum network.

BENEFITS OF STAKING

NO HARDWARE IS REQUIRED

Crypto Staking does not require specialised equipment, like proof of work. It functions without requiring any expensive equipment. The only requirement is to stake the GFM TOKENS on any linked exchange for a specified amount of time.

SCALABILITY

GFM has greater scalability because of its higher transaction speed and low fee.

MORE COST-EFFECTIVE

Our blockchain is a very cheap and energy-efficient system that doesn't need any expensive or specialised equipment. Compared to proof-of-work chains, it is less costly and less damaging to the environment. By using the GFM platform, the stakeholders may generate more passive income.

PASSIVE INCOME

stakeholders will be able to earn by staking and managing their digital assets.

ECO-FRIENDLIER

One of the major benefits of Staking GFM Token is that it doesn't need a continuous supply of energy to validate the Transaction. As a result, it is environmentally friendly.

SECURED BY SMART CONTRACT

security and privacy are the major concerns in the digital assets and GFM provides a swift and stable portal that is backed by the GFM ecosystem making him superior to others. GFM is offering a highly secure and fast platform to the users for Staking crypto.

GFM GOVERNANCE

We have a Governance ecosystem govern by community with platform users having total decision-making authority. Being a community-driven ecosystem that supports a gaming-focused environment, we will have access to various member-exclusive benefits. We will have a community fund whose sole purpose will be to fund startups, purchasing NFTs, digital assets, and other business ventures.

Members of the our governance ecosystem will have access to fun gaming-focused NFTs Play2Earn games and football tournaments. Members will also have voting rights on the use of community funds, business funding approvals, joint ventures, NFT investments, and other asset selections, including exchange, crypto, and NFTs. As a member of the DAO, ALL members will receive a designated equity stake in ALL business ventures undertaken by the DAO. Voting members will own an additional designated equity stake in approved business funding contracts and Joint Ventures. Members will also gain exclusive access to perks such as whitelisting on new projects, discounts on merch, airdrops, and much more.

The GFM DAO framework will feature the following:

Holders of \$GFM ecosystem governance tokens can now submit "proposals." on making any decision, The community then votes on the proposals.

The status of a proposal will change to "executed" once it has been voted on and passed by the community. If a plan fails to pass, its status will be changed to "defeated."

It guides the decision-making process among ecosystem stakeholders. Our goal at \$GFM is to disrupt traditional governance frameworks of all kinds to question how we think about governance.

WHY CHOOSE GFM?

Transparency & Immutability

Each time the asset or trade is recorded on the blockchain using our ecosystem, an audit trail is provided to track where the rewards are given. This can assist with security and fraud prevention in exchange-related firms and verify the rewards and incentives.

Lower Fees and Security

Fees linked with GFM transactions are significantly lower than other competitors.

Transaction Traceability

Because each new transaction is encrypted and connected to the prior transaction, GFM is significantly more secure than conventional record-keeping systems. GFM comprises a complex string of mathematical numbers that cannot be changed.

Ease of use

GFM is more valuable due to its ease of usage. You need a mobile device with an internet connection. By becoming a part of GFM, investors may quickly receive rewards.
